

ADVANCED REHAB CONSULTANTS, LLC

Dear Doctor:

You can greatly increase your revenue by hiring a physical therapist to work in your office!
And we have an affordable and simplified program to help you set up the entire process.

Before you know it, you can be on the fast-track to earning more, billing and collecting more, and signing up hundreds of new patients. As a chiropractor myself, I've used the system for the past eight years. My business partner and I have been so successful with our **DC/PT Integration program** that we have turned it into a **comprehensive guide** to help chiropractors across the country follow our steps and benefit from the same business growth and success that we have experienced!

The facts show that the average salary for chiropractors has been declining for years. But we can show you how to earn more, without actually putting more time in the office.

This was one of the reasons we created the DC/PT Integration program. We wanted a way to be able to bill insurance companies, including Medicare, more covered services, so we could earn more. Our success in creating this program is now helping other chiropractors across the country to implement what we did, and they are seeing the rewards all along the way.

The **benefits** of making the commitment to implement our affordable DC/PT Integration program speak for themselves: you will be able to earn more money, acquire more patients, spend more time focused on running your business, improve customer service, and help create a more stable and respected practice.

With our DC/PT Integration program, you will receive a comprehensive guide that walks you through the entire process of hiring a physical therapist (PT) to work in your office (and grow your business).

Our program:

- Explains the benefits of hiring a PT to help grow and stabilize your business.
- Guides you through the process of hiring, integrating and managing a PT.
- Helps you determine pay and benefits for the PT.
- Details the equipment that will be needed by the PT.
- Gives in-depth instruction on how to handle the office flow and PT billing procedures.
- Provides all the billing and coding rules and modifiers that you will need.

Additionally, our detailed lucrative program will provide you with office forms, proven marketing strategies, and protocol and procedure information that will help guide you through the entire process.

This program is not new. Indeed, consultants have been offering it for some time. What *is* new is that we are offering it as an all-inclusive guide. By opting to use a simplified and easy-to-follow guide, rather than hiring a consultant, you will pay only a fraction of the cost, since consultants typically charge upward of \$25,000 to help set this program up in your office!

We have streamlined the process and included everything you need to know in our DC/PT Integration program, which we are offering for the **affordable price of \$4,995** (or you can make two payments of \$2,395 each).

If you are ready to learn more, or take the next step, log onto our site at www.AdvancedRehabConsultants.com. We also invite you to call us for a free phone consultation so that we can answer your questions and explain how your office can grow and benefit from hiring a physical therapist to offer services. You can reach us at 866-914-2003.

We look forward to hearing from you and hope to have the opportunity to help you grow your business!

Sincerely,

Jim Walsh, Co-Founder
Advanced Rehab Consultants

P.S. Through hiring a Physical Therapist to work in our offices, in 2009 we signed up over 800 new patients, processed over 13,000 patient visits, received over 400 MD referrals, and collected over \$2 million, and we never treated a single patient. All treatment was performed by physical therapists. Our successful program can show you how do the same!

Testimonials

“ARC streamlined the procedure for me. I knew that Dr. Casey and Dr. Jim had spent countless hours learning and understanding how to implement a Physical Therapist into a Chiropractors world. I knew their model. I had the fortune of being not too far away from them. I’ve watched how they have grown. If you are thinking about joining ARC, just do it. What they are able to offer you is the ability to be able to sleep better at night. It really does make a difference and it is great to see the phone ringing again.” - Terry E, DC

“They have supplied the information you need and made it really easy with their paperwork. The manual really helps. It really supplies you with all of the tools you need to get started and implement.” – Andy R, DC
