

**Wouldn't you like to do more to protect your office from harmful pathogens?  
Our revolutionary surface and air disinfectant system provides that protection!**

Dear Animal Lover:

As you know, there are many primary pathogens in the air in veterinary offices and animal shelters. These pathogens can easily and quickly lead to many sick animals, and can even cause death. They are also a major concern for your staff. Because of this, we would like to introduce our revolutionary surface and air disinfecting system, to bring you peace of mind!

The PetAirapy surface and air disinfectant system provides maximum protection for both animals and humans. With it working constantly and quietly in the background, you can rest assured that your facility is being protected and that the risks associated with pathogens such as Parvo, flu and Feline Calisivirus, among others, have been safely and effectively removed!

Third-party clinical efficacy testing on PetAirapy has determined that:

**“...the tested system demonstrated excellent antibacterial and antiviral efficacy.”**

Our system gives you the results you need in order to maintain a safe office for your animals and staff, and it is reliable and effective on all sizes of facilities. The PetAirapy system uses advanced UVC light technology and disinfects within minutes! By continuously circulating the air, it efficiently removes viruses, mold, and bacteria.

Why are so many facilities turning to PetAirapy? It's simple – our system effectively:

- **Removes harmful pathogens** that can lead to illness, outbreaks and death.
- Gives **fast-acting results**, so pathogens don't have a chance to spread.
- **Provides peace of mind** because you, your animals and your staff are safer.
- Supplies effective protection through an **all-natural method**, avoiding toxic chemicals.
- Circulates the air, **removing odors** in addition to harmful bacteria and pathogens.
- Provides **natural allergy relief** for sensitive pets and people.

Are you ready to have the PetAirapy surface and air disinfectant system protect your building? **Call us today at 866-994-2473 for a free consultation** or visit [www.petairapy.com](http://www.petairapy.com). We look forward to hearing from you!

Sincerely,

Annette Uda  
Founder

**P.S. Did you know that a system like Pet Airapy could provide so much protection?**
